When in 4D it is easy to travel back to a 3D state, however this jump in consciousness is much more difficult when you reach a 5D state. 4D consciousness begins to awaken to the idea that we are all connected and that there is more to life than what meets the eye. Thoughts are powerful and can shift the way reality is perceived.

The relationship between 6D and 4D is the same as the one between 5D and 3D. They both share the same print, but differ in that one has a gloss layer and the other does not. The 6D carbon fiber (3.4mil) is the same thickness as the 5D. While this looks and feels like real carbon fiber it does require some practice to get a perfect laydown on the vinyl. So now that you understand a little more ...

In this overview article, we summarize our recent computational efforts in understanding the curious properties of magnetic double perovskites with 3d and 4d/5d transition metal ions, make predictions on new functionalities in known compounds of this family, engineering functionalities via chemical modifications/doping and prediction on a new set of magnetic 3d-4d/5d double perovkite compounds, which may be synthesized to explore and expand further this interesting family.
