From the moment babies are born, sensory experiences begin to play a role in development. While early experiences are largely centered on such sensory information, the environment continues to exert a powerful influence on behavior throughout life. Genetics play an important role in development, but experiences are equally important. For example, genetics may influence how a child's brain is wired from birth, but learning and experience that will literally shape how that ...

This festschrift in honor of the work and legacy of Dr. Marc Groenhuijsen provides an international and holistic overview of recent developments in victimology, taking a global scope but grounded in everyday experiences of victims. Its multidisciplinary perspective reflects a range of approaches and practices in victimology, including contributions from the fields of social work, criminology, sociology, psychology, and law.

An International Perspective on Contemporary Developments ...

reconstructions. In that sense, prior knowledge and earlier experiences have great importance for the long-term cognitive development. In a new context, earlier experiences might have negative as well as positive effects. Old experiences can cause serious conflicts. Tall (2004) calls such old experiences 'met-before's'. An

RETIREMENT AS PROCESS AND CONCEPT

This book celebrates the work of Patricia Werhane, an iconic figure in business ethics. This festschrift is a collection of articles that build on Werhane 's contributions to business ethics in such areas as Employee Rights, the Legacy of Adam Smith, Moral Imagination, Women in Business, the development of the field of business ethics, and her contributions to such fields as Health Care, Education, Teaching, and Philosophy.
